A Centre of Excellence for Education in Indonesia

“We prepare students not only for school but for life.”
We live in an increasingly global society where international perspectives are essential for progress.

At Sekolah Ciputra, the most fundamental way in which this is recognised is through the International Baccalaureate programmes: the Primary Years Programme (PYP), the Middle Years Programme (MYP) and the Diploma Programme (DP).

Sekolah Ciputra is one of only 360 IB Continuum Schools globally where students can enjoy a consistent Baccalaureate authorised, learning experience from Play Group to Grade 12.

It is little wonder that so many schools from around Indonesia want to come to see what is happening at Sekolah Ciputra, A Centre of Excellence for Education in Indonesia.
The Toddler class seeks to capture the imagination of young children by engaging them in songs, rhymes, games and outdoor play. A low ratio of 1 teacher to every 7 students ensures maximum attention and support for the development of each child to take place. Every child has the opportunity to interact meaningfully with teachers and explore the world around them in a modern, inviting and comfortable environment. Outdoor play is introduced to foster the development of gross-motor skills and social interactions.

**CLASS SCHEDULES**  
(Choice & Availability):
- 2x a week: Tue/Thu
- 3x a week: Mon/Wed/Thu
- 1st Session: 08.00 – 10.00
- 2nd Session: 10.15 – 12.15

---

**PLAY GROUP**  
2-4 years old

The IB (PYP) Primary Years Programme is officially implemented at the Play Group B level. As students become increasingly curious about the world, the Play Group Programme reflects their development by providing a rich and interesting learning environment for them to ask and answer questions. Concepts related to maths, science, language, as well as fine and gross motor skills are woven into a play-based approach to learning. Children are introduced to and exposed to English early through daily conversations, story time and English literacy activities.

**MONDAY – FRIDAY**

**Play Group A:**
08.00 – 10.00  
10.15 – 12.15

**Play Group B:**
08.00 – 11.00
Early Childhood Education is critical in preparing children to enter and succeed at school, enhancing their social and emotional well-being and developing their confidence and independence.

Parents should look carefully at the kind of education their children will need in order to function effectively and successfully in today’s world. Choosing a programme such as the International Baccalaureate (IB) at Sekolah Ciputra, means that parents are choosing to prepare their children for a global outlook that focuses on Business, Technology, Sciences and the Arts.

OUR STATE OF THE ART

EARLY YEARS BUILDING:

- A modern, spacious facility, built for young children.
- Classrooms are airy, bright and well-equipped with the latest educational materials and technology combining the latest research in playing and learning.
- Modern playground equipment for outdoor play.
- Large shaded areas for reading and listening.
The PYP A and B Programmes are framed around the IB PYP Transdisciplinary Themes and aim to develop the whole child both within and beyond the classroom.

Units of Inquiry are organised to allow students opportunities to explore concepts related to Maths, Science, Social Studies and Language Development.

Religious Education, the Performing Arts and Physical Education are also included in the Programme of Inquiry and students communicate their thoughts and ideas in English, Bahasa and Mandarin.

Classrooms are interesting and comfortable spaces, well-equipped with SMART Boards and hand-held devices to support 21st Century learning. Outdoor play is a regular feature of the school day and field trips are organised to offer students experiences beyond the classroom.
Students and teachers in the Primary Years Programme engage in Units of Inquiry using Central Ideas and Lines of Inquiry to research, explore, analyze and represent their best thinking on issues related to the world in which we live. Teachers use questions to provoke further questions from students and then support and guide them in finding answers to their questions.

A Transdisciplinary Approach to teaching and learning means that all subject areas are explored within the context and content of the inquiry. Teachers identify and teach the scope and sequence of skills related to the various subjects that are needed for students to conduct their inquiries successfully. Assessment is done on an on-going basis using a series of observations, tests, projects, quizzes, visual representations, artistic and athletic performances and oral presentations.

Field trips, guest speakers and overnight camp experiences are some examples of students learning outside the classroom. A wide range of extra-curricular activities are offered by staff as well as external providers in order for students to pursue their interests and passions.

Students are guided to develop their leadership skills through the Student Council (STUCO). STUCO is organised for students by students and gives them the opportunity to have their voices expressed and heard in the daily life of the school.

The PYP Exhibition for Grade 6 students is the culminating event for students finishing their PYP programme. It is a perfect opportunity for them to prepare for their next stage of education, the IB Middle Years Programme (MYP).
Entrepreneurship is widely recognised as the key to continued national and global development. The skills of entrepreneurship are developed through teaching and experience by:

- Promoting the development of personal qualities relevant to entrepreneurship, such as creativity, risk-taking and responsibility.
- Raising students' awareness of self-employment as a career option.
- Providing students with opportunities to develop and display the technical and business skills essential in entrepreneurial activities.

THE IB MIDDLE YEARS PROGRAMME (MYP) GRAD 7 - 10

There are eight subject areas including Languages (English, Bahasa Indonesia and Mandarin which are divided into 2 levels: Language A and B), Individuals and Societies (Religion and Pendidikan Pancasila as the mandated subjects by the Government are also taught), Science, Mathematics, Art, Design (Technology), Physical and Health Education (PHE).

Two full-time counsellors are in MYP to support and assist students’ in general academic, personal, social, and emotional development.

To support these subjects, all students take part in the Service as Action programme.

This is a way to make links between learning at school and the real world. At the end of the MYP Grade 10 students demonstrate all of their newfound knowledge, understanding and skills through an independently conducted "Personal Project".
“I respond with confidence and reason to an ever changing world.”

**Gabby Gracia Salim**

“Teachers are very interactive, the facilities here are excellent. The Diploma Programme really helped me a lot! I am already used to having lots of assignments and tests, so university was not much of a shock.”

Gabby Gracia Salim (Graduated 2015)
15 years at Sekolah Ciputra
Studying Finance at UNSW, Australia
Diploma Programme Result: 40

**William Parwoto Wirono**

“The hard work that I put in to the IB Diploma was undoubtedly one of the most unforgettable moments that I had in Sekolah Ciputra. Apart from that, the friendships that I made in Sekolah Ciputra also allowed me to make contact with those in the United States.”

William Parwoto Wirono
(Graduated 2016)
16 years at Sekolah Ciputra
Studying Industrial Engineering and Mathematics at the University of Wisconsin-Madison, USA
Diploma Programme Result: 41

**Andianto Indrawan**

“I found that in Sekolah Ciputra I got early exposure of scientific writing and research paper writing, so this wasn’t new and shocking for me when I went to university. The communication skills that I acquired during High School also helped me during my study and my practice.”

Andianto Indrawan (Graduated 2012)
Airlangga University – Faculty of Medicine – Medical Programme

**Anthony Utomo**

“Sekolah Ciputra helped me to gain a competitive edge as a student, to be aware of the surroundings outside the school and open up my paradigm as a global citizen.”

Anthony Utomo (Graduated 2003)
Studied at University of Seattle, USA.
CEO of Utomodeck, an Indonesian based metal roofing company specializing in long span building.

**Over 70% of Our Graduates Go Overseas to Leading Universities**

**The IB Diploma Programme (DP)**

**Grade 11-12**

Monday – Friday: 07.30 - 15.00

The Diploma Programme requires students to study DP Language A in mother tongue, DP Language B (second language), a Humanities course, a Science course and Mathematics as well as a subject from the Arts or from one of the other sections. Students also study the Theory of Knowledge, write a 4,000 word Extended Essay and complete a Creativity, Activity and Service programme. With these projects and support they receive from their teachers, students gain an understanding and preparation for what is required of them to succeed at university.

Two full-time counsellors are in the DP to support and assist students’ in general academic, personal, social, emotional, and career development.

Senior students wishing to matriculate in Indonesia are catered for with the School Based Diploma Programme which culminates in the UNAS examinations.

Most of our graduates go on to University, with over 70% heading to North America, Australia, Singapore, China, Japan and Europe. Those who complete the IBDP often receive advance credits potentially reducing the years required to obtain a degree. For this reason alone, it is sensible to complete the High School qualifications at Sekolah Ciputra and move on to university well prepared and ready for success.
High achievement comes through a combination of ability, persistence, resilience, balance and creativity, supported by well trained teachers using a consistent pedagogy from Play Group upwards and high quality technology throughout the school. All students are encouraged to be the best they can be and our results, local, national and international, illustrate this.

"I achieve academically at the highest standard of which I am capable."

"I can explore more! It’s always exciting."

The school is purpose built and has an extensive range of facilities to support students’ learning and recreation.

**Ciputra Hall - Performing Arts Centre.**

This is a state of the art facility with seating for 710. Ciputra Hall has a great acoustic level with an excellent sound system along with lighting and multimedia facilities to create incredible performances. The visual and sound qualities are outstanding. Although a school facility, the Hall is very much part of the Surabaya community. There is no other building in Surabaya like it and the school is enthusiastic to share it with other lovers of the Performing Arts. The Hall represents one more step in Sekolah Ciputra’s desire to provide the best for its students.

**Other Facilities:**

- Interactive Computer Technology (SMART Boards) in every classroom, supported with updated IT Technology.
- 3 computer labs fully equipped with over 100 networked computers.
- 2 Learning Resources Centres with over 40 computers and extensive library collection
- Soccer fields, running track and adventure playgrounds
- International standard Gymnasium with 2 basketball courts
- CCTV throughout the school
